SWINGFLEX DOORS

Flexible Impact Doors

PVC swing doors are ideal for use in all applications. With increased hygiene standards due to the stainless steel profiles, these doors are also suitable in industrial kitchens, canteens, storage areas for foodstuffs, and other clean areas.

maxiflex[®]

The innovative, functional suspension of the door sheet allows quick and trouble-free changing should replacement be necessary. Swing doors are suitable for indoor use and open full 90 degrees – with double swing action.

- Doors are washable by a high-pressure washer
- Environmental control
