

ANTI-INSECT

Specially designed to bring Anti-insect properties to flexible PVC in addition to all the existing qualities (clarity, brightness, durability, flexibility and strong resistance to impact). Repelling up to 80% of all flying insects, including spiders and ticks, that land on the product. It kills 100% of mosquitoes that touch the vinyl during a 12 month time period.

The Anti-insect PVC is specifically recommended for strip curtain doors and partitions that will encounter insects. It will efficiently repel insects and prevent infiltration of areas like schools, hospitals, health centres, factories, industrial workshops, commercial shops, public buildings and private residences.

The repulsive agent within the **ANTI-INSECT** is perfectly safe for humans and recommended by the WHO (World Health Organisation) to prevent mosquito-borne diseases such as Dengue Fever and Malaria.

Features

- Transparent
- High surrounding repellency effect
- Kills up to 100% of the mosquitoes in contact with the vinyl
- Safe, repulsive agent recommended by the WHO

Format:

- Rolls and strips
