

Protection Screens

New improved modular design can be arranged as corners or cubicles

Screen available in blue or yellow

Standard Features:

- Standard size - 2x2m
- Standard screen - yellow or blue protection sheet
- Frame is made of galvanised steel
- Wheels

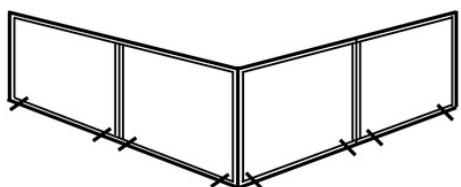

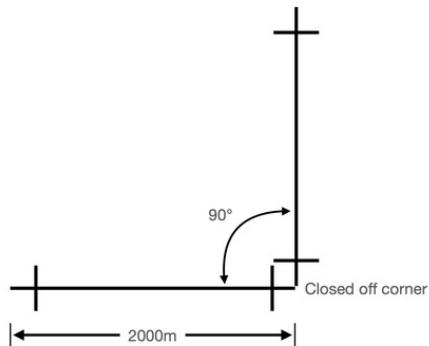

Options available on request:

- Different sizes
- Welding strips in red or green
- Powder coated frame in yellow or black

Better Frame = Better price

- Modular frame, which can be easily arranged to suit your needs.
- More cost effective design.

- Use as a single screen or an arrangement of partitions to create corners or cubicles.
- The feet are positioned away from the ends of the frame which gives excellent stability, and allows the frames to be placed together at 90° angles without leaving a dangerous gap.
- Self Assembly - Protection screens are supplied in kit form with simple assembly instructions
- Easy to install

Safety

Protection sheet

- Prevents arc eye
- Filters damaging UV light
- Tested at 300-360nm – transmission “nil”

Welding strips

- Certified DIN EN ISO 25980:2015-01
- Suppression of at least 99.9998% of UVB and UVC radiation

Available in red or green welding strips

Screens for use in manufacturing areas for protection against welding flash & sparks, cutting, grinding, noise, and wind.
